Introducing V.A.C.Ulta™ Negative Pressure Wound Therapy System

THE PROVEN BENEFITS OF V.A.C.® THERAPY

Designed for Use with Trusted V.A.C.® Therapy Accessories:
Compatible with all V.A.C.® Therapy Dressings and InfoV.A.C.® Therapy Canisters

NPWT Feedback System
The unique SensaT.R.A.C.™ Technology provides continuous feedback for enhanced negative pressure accuracy and pressure monitoring at the wound bed

Enhanced Graphic User Interface
Intuitive touch screen menu
Simple therapeutic programming
Seal Check™ Leak Detector offers instant feedback to help identify leaks

Customized Pressure Algorithms
Continuous negative pressure (from -25 to -200 mmHg)
Dynamic Pressure Control™: The evolution of intermittent therapy to help prevent leaks and fluid accumulation that can occur when there is no negative pressure at the wound site

V.A.C.® Therapy promotes wound healing through well-established mechanisms of action.

Macrostrain:
- Decreases wound margins
- Removes exudate
- Reduces edema
- Removes infectious material

Microstrain:
Promotes granulation tissue formation and perfusion by means of:
- Cell proliferation
- Fibroblast migration
V.A.C. VeraFlo™ Therapy combines the benefits of V.A.C.® Therapy with automated solution distribution and removal. It can help:

- **Cleanse**
  - the wound with instillation of topical wound cleansers in a consistent, controlled manner

- **Treat**
  - the wound with the instillation of appropriate topical antimicrobial and antiseptic solutions and the removal of infectious material

- **Heal**
  - the wound and prepare for primary or secondary closure

**V.A.C. VeraFlo™ Therapy**

Proven V.A.C.® Therapy with automated fluid distribution and removal to deliver additional therapeutic options and benefits

**V.A.C. VeraFlo™ Therapy Provides:**

- **Volumetric Delivery**
  - Automated delivery of topical wound solutions

- **Fill Assist**
  - Helps determine the correct instill volume

- **Dressing Soak**
  - Instills topical wound solutions into the wound for easier dressing removal and increased patient comfort
